Introduction To Stallion Pumps

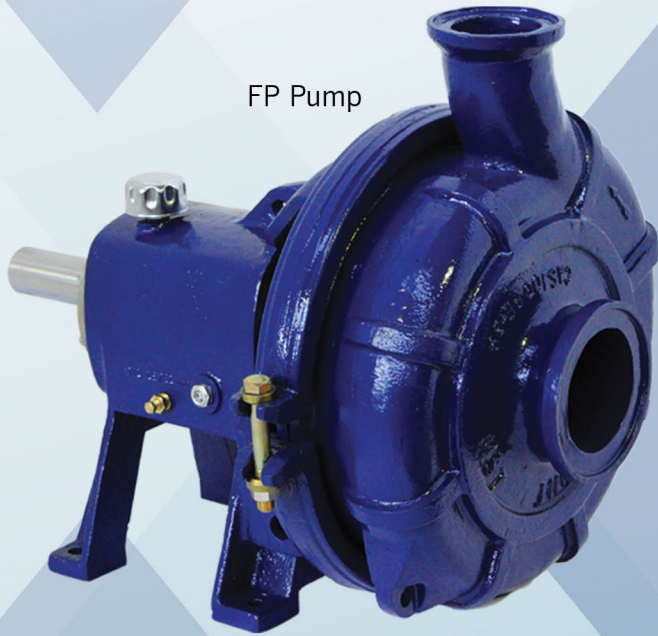

The challenge of designing, manufacturing and marketing a range of slurry pumps has been an exciting one. Key criteria to our success has been:

- Wear resistance in corrosive and abrasive slurries - improved materials.
- Extending wear life.
- Improving efficiencies.
- Cost effective solutions.

The Stallion range of pumps have been engineered to provide all of the above and more.

PF Pump Range

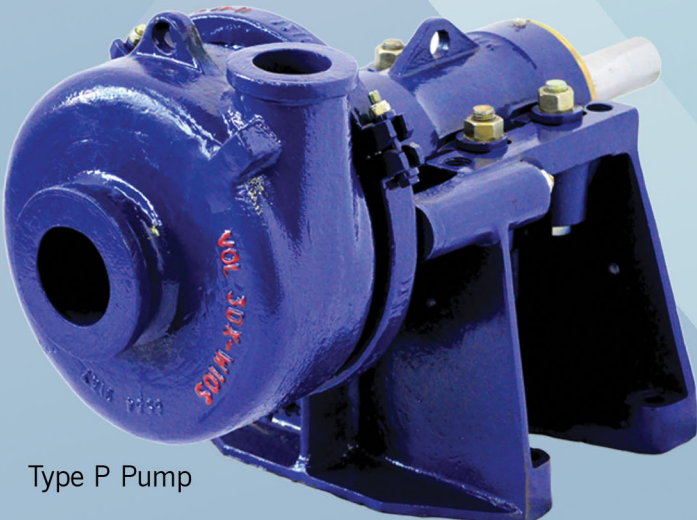

The PF pump range has been designed to offer reliability in dewatering and process water applications.

FP Pump

Type P Pump Range

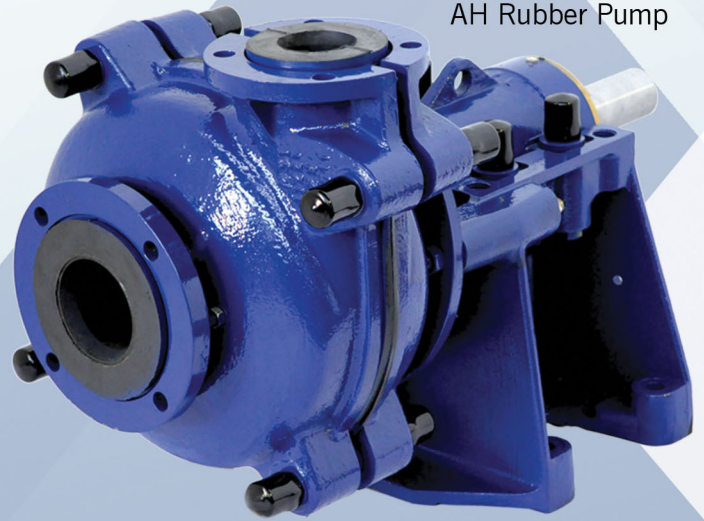

The Type P pump range is suitable for all medium duty slurry applications. All chrome wet end.

Type P Pump

AH Pump Range

The AH range has been designed for corrosive and erosive slurries. A combination of wet end materials are available such as chrome, rubber, various grades of stainless steel & alloys.

AH Rubber Pump

QV-65 Pump Range

The QV range has been designed for corrosive and erosive slurries. A combination of wet end materials are available such as chrome, rubber, various grades of stainless steel & alloys.

QV-65 Pump

DTV Pump Range

The DTV pump range is suited to all sump applications; spillage, carbon transfer etc. Various column lengths and materials of construction are available. Chrome, rubber & stainless steel are suited for corrosive and/or abrasive sump applications.

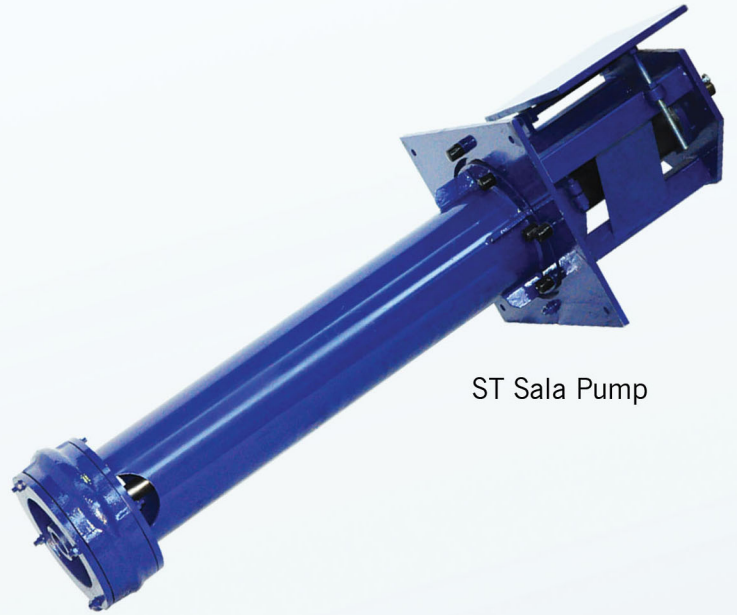

DTV Pump

Sala ST Range

Our Sala ST range of pumps are specifically designed to handle highly abrasive slurries.

Our robust pumps also feature a simple design aimed at making installation and maintenance an easy task.

ST Sala Pump

VF Pump Range

The VF pump range have improved tank and impeller designs for more efficiency when pumping frothy slurries.

VF80 Pump

Replacement Spares

All pumps and spares are manufactured in house, thus maintaining our quality standards.

Ongoing research and development is carried out in developing materials that can withstand the abrasive conditions with which our pumps are faced.

Recommended spares are readily available on a 24/7 basis.

Pump Size Chart [Warman Pump Equivalents]
